Education

Southeastern Louisiana University — Hammond, LA
Bachelor of Science in Computer Science, Concentration in Data Science | GPA: 3.9 — *Expected May 2029*

- Coursework: Data Structures, Algorithms, CS Fundamentals, Data Analysis, Calculus-II, Data Science | Honors Program and Honors Society; working toward Honors Sophomore Distinction

Experience

First Desk Assistant — Aug. 2025 – Present
Innovation Lab, Southeastern Louisiana University — *Hammond, LA*

- Primary contact for 100+ daily visitors, providing technical support and equipment assistance with 95%+ satisfaction
- Manage the checkout/inventory system (50+ transactions weekly) and troubleshoot student workstation issues

AI Systems Integrator Intern — June 2026 – August 2026
Sports Media Inc. — *Remote*

- Supported integration of AI-driven tools into marketing and media workflows for a national sports marketing agency
- Researched and evaluated AI APIs and documented findings for a distributed team

Projects

Relay-4 – AI Emergency Dispatch | *TypeScript, React, FastAPI, ElevenLabs* — github.com/birkunwardipson/Relay-4

- Won the Intermediate Division at Geaux Hack 2026 on a four-person team; built an AI dispatcher that turns ElevenLabs voice calls into structured incident records for human dispatchers to review, correct, and assign
- Configured the ElevenLabs voice agent and its tools, designed the React frontend, and pitched the project to the judges

SolPOS – Blockchain POS Terminal | *JavaScript, Next.js, Solana, USDC* — solpos.vercel.app

- Built a full-stack POS terminal on Solana enabling USDC payments at $0.00025/transaction, a 1,300x fee reduction versus Stripe
- Implemented QR-code Solana Pay checkout and a merchant dashboard with real-time revenue tracking and AI-assisted product pricing lookup

Dual-Style AI Image Generator | *Python, PyTorch, Stable Diffusion, LoRA, Gradio* — huggingface.co/dipson-bir

- Trained anime and photorealistic LoRA adapters on Stable Diffusion 1.5 via DreamBooth, hosted on Hugging Face
- Built a Gradio style-switcher UI with adapter selection and strength/inference controls; diagnosed and documented a recurring torchao dependency fix

Fortune 500 Nonprofit Partnership Platform | *JavaScript, Node.js, Express, PostgreSQL, Supabase*

- Engineered backend infrastructure matching nonprofits with Fortune 500 partners using Node.js/Express and Supabase/PostgreSQL
- Resolved database connectivity failures and remediated a SQL injection vulnerability found during a security-focused code review

Leadership & Activities

Google Developer Group (GDG) Southeastern & Cybersecurity Club | *Active Member* — Aug. 2025 – Present

- Collaborate with 50+ student developers on Google-technology projects and hackathons; train weekly in network security, ethical hacking, and threat analysis

Association for Computing Machinery (ACM) | *Active Member* — 2026 – Present

- Engage in networking events, technical talks, and collaborative projects with computing peers

Technical Skills & Awards

Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, SQL
Tools & Technologies: Git, GitHub, Linux, Data Analysis, Microsoft Office Suite
Concepts: Data Structures, Algorithms, Object-Oriented Programming, Data Visualization, Technical Support
Awards: Intermediate Division Winner, Geaux Hack (2026); AI Project Inter-School Competition Winner – Provincial Government of Nepal (2023)
Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
